## **Acknowledgements**

The present thesis is the collection of the studies, which have been carried out under the guidance of Professor Satoshi Tsuneda (Department of Life Science and Medical Bio-Science, Waseda University) and emeritus Professor Akira Hirata (Waseda University) as supervisor and Professor Yuhei Inamori (Fukushima University) as the joint researcher.

The author would like to express his deep and endless gratitude to Professor Satoshi Tsuneda and emeritus Prof. Akira Hirata for giving such a great chance, their fine direction, continuous support, and helpful advice. The author is very proud of having become the member of Tsuneda laboratory.

The author acknowledges Dr. Yuhei Inamori, Dr. Kaiqin Xu, Dr. Yoshitaka Ebie, at National Institute for Environmental Studies (NIES) for his splendid support, great help and suggestions. Needless to say, this thesis work could not have been realized without their guidance and continuous support.

The author would like to appreciate Professor Kiyotaka Sakai, Professor Izumi Hirasawa (Department of Chemical Engineering, Waseda University) and for their constructive and useful comment.

The author acknowledges Dr. Sachiko Yoshie (Railway Technical Research Institute) at NIES for giving instructions that prompt me to conduct this study and for giving fine direction and supporting my academic life. The author also acknowledges Dr. Tatsuhiko Hoshino (University of Vienna), and Dr. Takashi Kondo (NIES) for giving useful advice. The author is very grateful to the all members in both Tsuneda Laboratory

and Bio&Eco Engineering Laboratory, especially to his members: Mr. Kouseke Shirotani for his great help and contribution to carry out the study, and Dr. Yuko Kuniyasu, Mr. Ken Adachi, Mr. Takeshi Terahara, Mr. Kazuhiro Furukawa, Mr. Yasuhiro Date, Mr. Kazuya Yokosawa, and Ms. Tomoko Yamamoto for their great support.

The author also appreciates Ms. Atsuko Nagase, Chieko Hanawa, Ms. Yasuko Nagashima, Yuko Sakamoto and Ms. Hiroko Takeno secretary of the Laboratory for their heartfelt support.

The author was financially supported by a RA of 21COE program in 2004-2006.

Finally, the author would like to express her deepest gratitude to his parents for their understanding, encouragement, and support.
